

10WB Instructions

It all began in the Middle East, a land of mystery and intrigue, with Sheiks, who while riding gaily decorated camels and spirited horses, ruled the desert with golden sceptres and gilded swords. This was the birthplace of the famed puzzle rings. Centuries ago these puzzle rings served as wedding bands, and were worn by women of nomadic tribes. The husband held the secrets of the rings. This guaranteed his wife's faithfulness, for the ring once removed from her fingers would fall apart.

<p>1. Hold band stamped "1" (rounded outside band) with the irregular portion up and in your left hand.</p>	<p>2. Bring Bands stamped "2" (other outside band) up against "1" bands forming a diamond shape. Note – these are the outside bands when the ring is assembled.</p>	<p>3. Bring up two more bands from bottom on each side. These are bands "5" "6", "7" and "8". They will fit together with two bands remaining hanging underneath.</p>	<p>4. Grasp band stamped "Jose" in your right hand with the stamp facing towards you, allowing the six bands (1, 2, 5, 6, 7 & 8) to fall to one side. This band is the one that crosses over on a diagonal when the ring is assembled.</p>	<p>5. Bring 2nd band stamped "4" up behind "Jose" band. The two bands should fit together and act as one.</p>	<p>6. Take two bands stamped "3" and fit together. They also act as one band. Bring the two bands up together towards you with your left hand until the bands are parallel. Note the "3" stamp is facing you.</p>	<p>7. Holding two "3" bands between your thumb and forefinger, turn bands clockwise from top. The stamped sides of the "3"s should now be on the inside.</p>
<p>8. Continue turning until you have completed a 180-degree rotation.</p>	<p>9. The bands should fit together, holding the six outside bands.</p>	<p>10. When the previous step is completed, the "3"s and "4"s should form an X at the top.</p>	<p>11. Take the first band on the side which was facing you when you did steps 7 and 8" which is "8" and rotate the band until the</p>	<p>12. Bring band up and fit against "3" and "4". Be sure that the v-shaped part is over the remaining loose bands.</p>	<p>13. Bring band up and it will fit next to bands "3" and "4".</p>	<p>14. Turn ring over and start rotating "7" band until the irregular shaped part is on the inside of the ring.</p>

			irregular shaped part is on the inside of the ring.			
						
15. When you have completed the rotation, bring "7" band up against the other bands, again being sure that the "v" shaped part is over the remaining loose bands	16. Bring band up so that it fits flat against the other bands.	17. Turn ring over and fit the "2" and "6" bands flush against each other (they act as one). Rotate them together until the irregular v-shaped parts are on the inside of the ring.	18. When you have completed the rotation, be sure that the "v"s are <u>over</u> the remaining bands. If you have a tight weave ring, you may want to leave this band loose, as the tight weave requires you to complete the next steps before it will fit into place.	19. Turn ring over and fit the "1" and "5" bands together (they also act as one). Rotate the bands together until the irregular v-shaped parts are on the inside of the ring and <u>under</u> bands "2" & "6".	20. The last bands should fall into place.	14. Congratulations, you have assembled your ring.
